- Dividend Distribution Risks
 - Dividends from the underlying fund(s) may be adversely affected by (amongst others) investee entities suffering unexpected losses and/or paying lower than expected dividends.
 - AIA Singapore intends to distribute dividends from the income and/or net realised gains of the ILP Sub-Fund, and AIA Singapore maintains the discretion to distribute dividends out of capital. Where dividend distributions are made out of capital, it may lead to a reduction in investor's original investment and may also result in reduced future returns to the investor.
 - Both capital and dividend distributions are non-guaranteed.

Please refer to the AIA Investment Fund Product Summary and Product Highlight Sheet for further details on dividend distribution and risks associated with the ILP Sub-Fund.
